06 FINANCIAL PLAN

THE PROBLEM

THE FINANCIAL GUIDANCE GAP

- In France, 37% of people have been overdrawn (en découvert) at least once in the last 12 months.
- While France has one of the highest savings rates in Europe, less than half (45%) of the population actually sets long-term financial goals.
- Customers lack personalized guidance for major life goals (home, retirement, savings)
- Intensified by societal challenges (inflation, low financial literacy)

THE OPPORTUNITY

- We can transform the banking application from a historical ledger into a **Financial Coach**.
- We will move the customer from asking “What did I spend?” to “What should I save?”

OUR SOLUTION

WHAT WE COULD DO

BUSINESS MODEL

B2B2C

TECHNICAL SOLUTION

A widget in the bank apps
(Secure & Auditable)

OUR VISION

WHAT WE COULD DO FOR BANKS

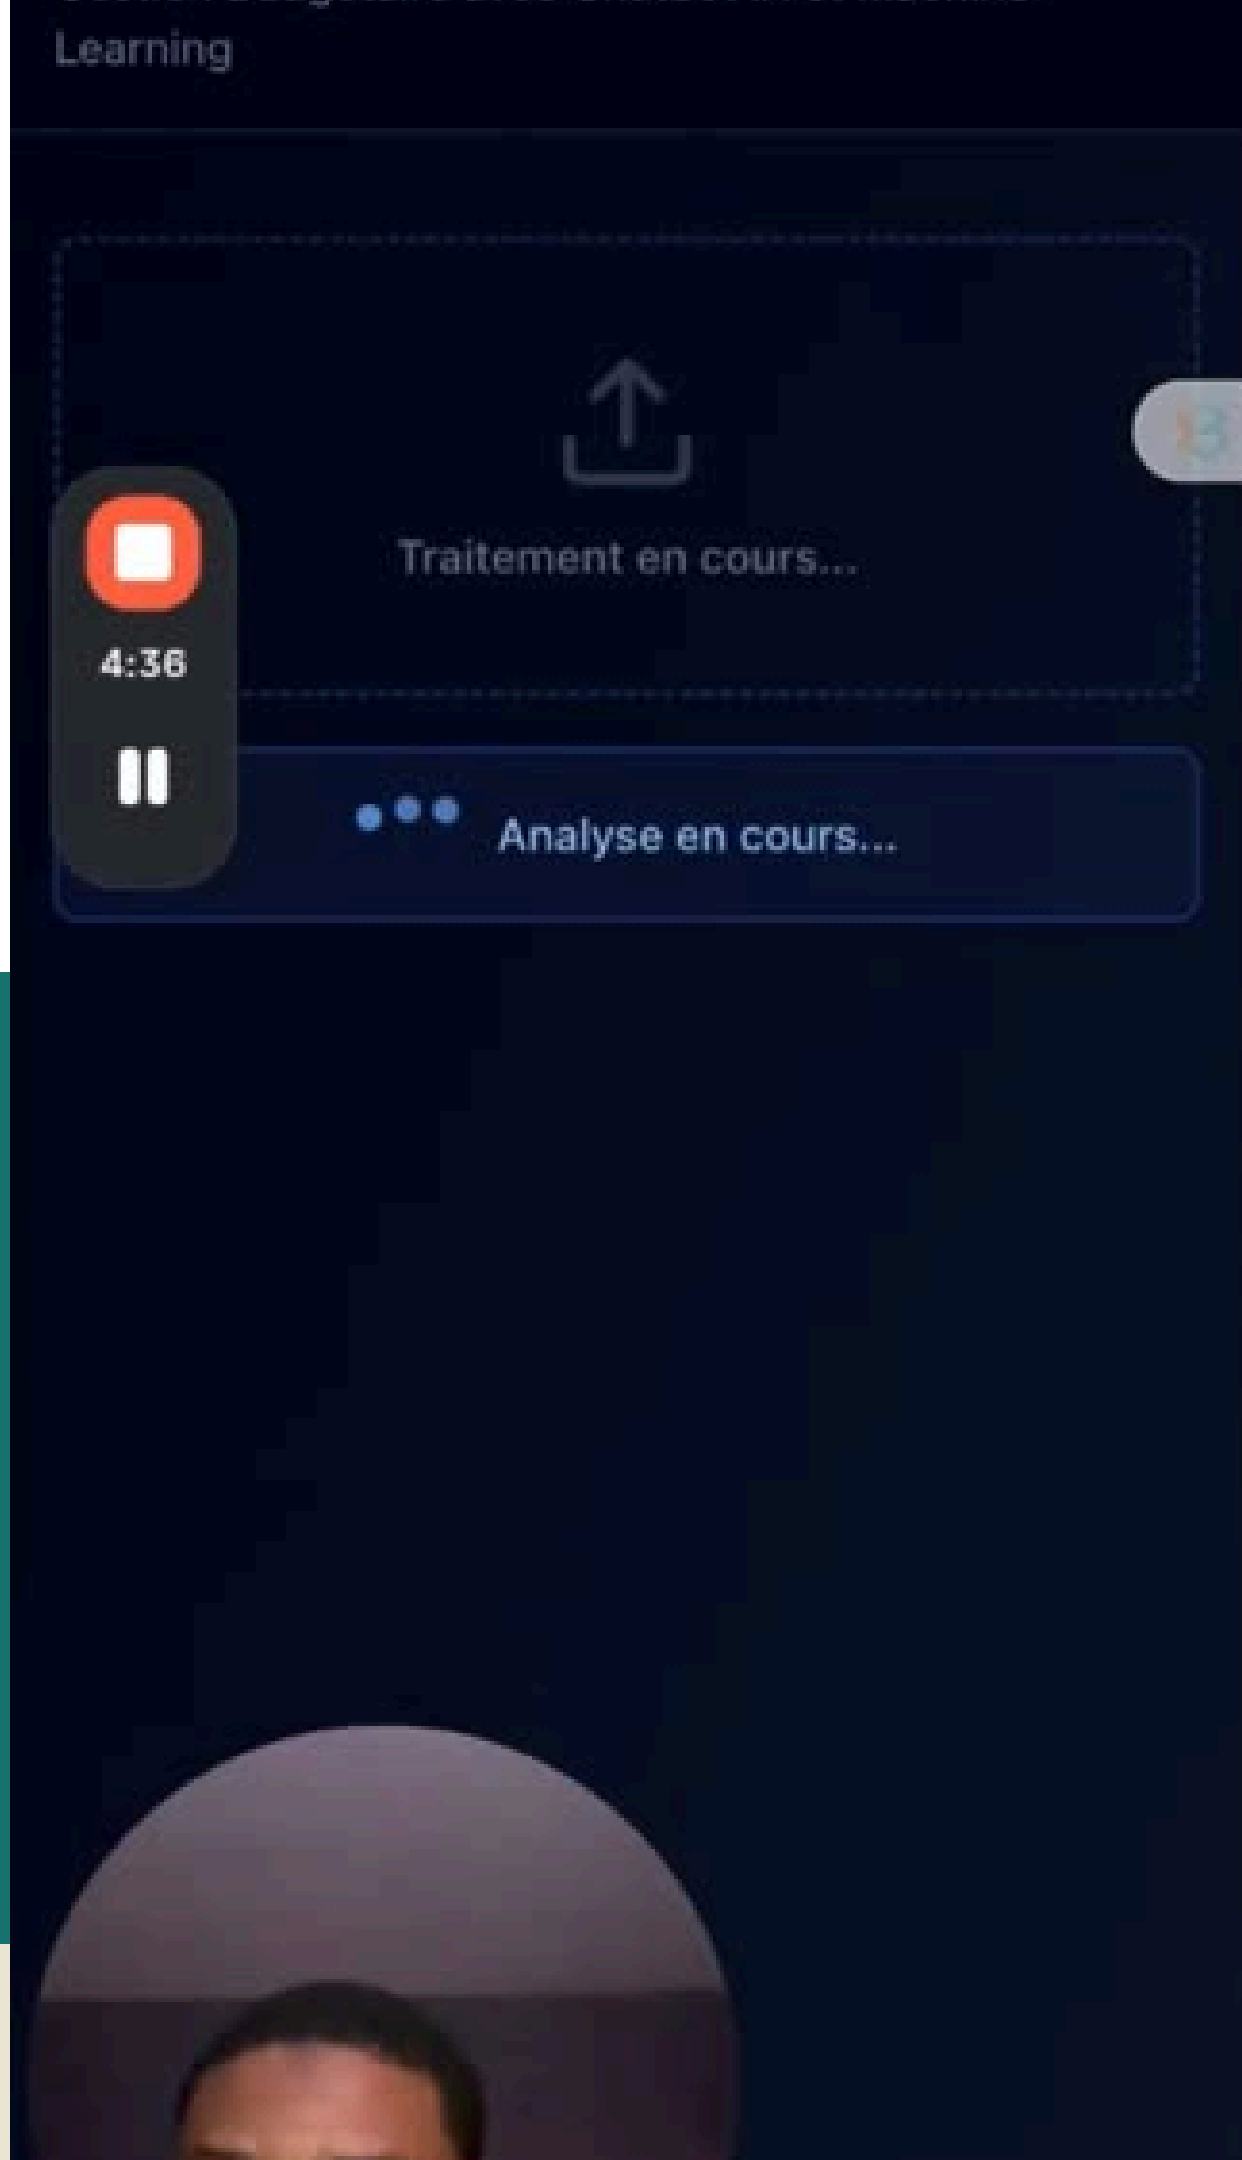

Category	Current Problem (The Status Quo)	Our Value Proposition
Customer Experience	Static Visualization: Banks currently offer good visuals for past spending history , but <i>nothing</i> about future projections or predictive advice.	Proactive & Predictive Guidance: We transform past data into actionable future strategies : bill optimization, maximized residual savings, and goal achievement planning.
Engagement	This static experience leads to low engagement on the mobile app and a high risk of long-term customer churn .	Augmented Loyalty: We make the banking application <i>indispensable</i> through a continuous, evolving financial companion, increasing session frequency and duration.
Revenue	Product recommendations are generic and poorly contextualized.	Intelligent Monetization: Generate new revenue opportunities through hyper-personalized product recommendations (loans, insurance, investments) with a higher conversion rate.

OUR VISION

WHAT WE COULD DO FOR CUSTOMERS

Category	Current Problem (The Customer Asks...)	Our Value Proposition (The AI's Answer)
Core Need	"What do I need to do right now to achieve my goals?" The user sees raw data but lacks a clear, actionable plan for their objectives (travel, purchase, retirement).	Actionable, Timely Advice: Transforming ambition into precise daily/monthly steps . Example: "Save \$25 more this week by cutting down on fast food to stay on track for your travel goal."
Savings & Spending	"Am I spending too much? How much could I realistically save?" The user lacks visibility on their residual savings potential.	Proactive Residual Income Optimization: Automatic identification of saving opportunities (bills, subscriptions) and intelligent maximization of residual income after discretionary expenses.
Financial Literacy	"How should I start investing? What is my risk level?" Wealth management remains intimidating and reserved for experts.	Democratization of Wealth Management: Providing investment and savings recommendations matched to the user's risk profile , clearly explained by the AI, making financial planning accessible to everyone.

- View ML Analyses
- chat with the agent through a rag systems about his finances

MARKET OPPORTUNITY

TAM SAM SOM

TAM

Total Addressable Market — €2.3B

Global Personal Finance Management + EU AI Banking segment

Global PFM market valued at ~€1.3B in 2024, growing at 5.1% CAGR. EU AI/Fintech banking segment adds ~€1B. Sources: DataBridge, France FinTech 2024.

SAM

Serviceable Addressable Market — €380M

French retail banks + neobanks (300+ licensed institutions)

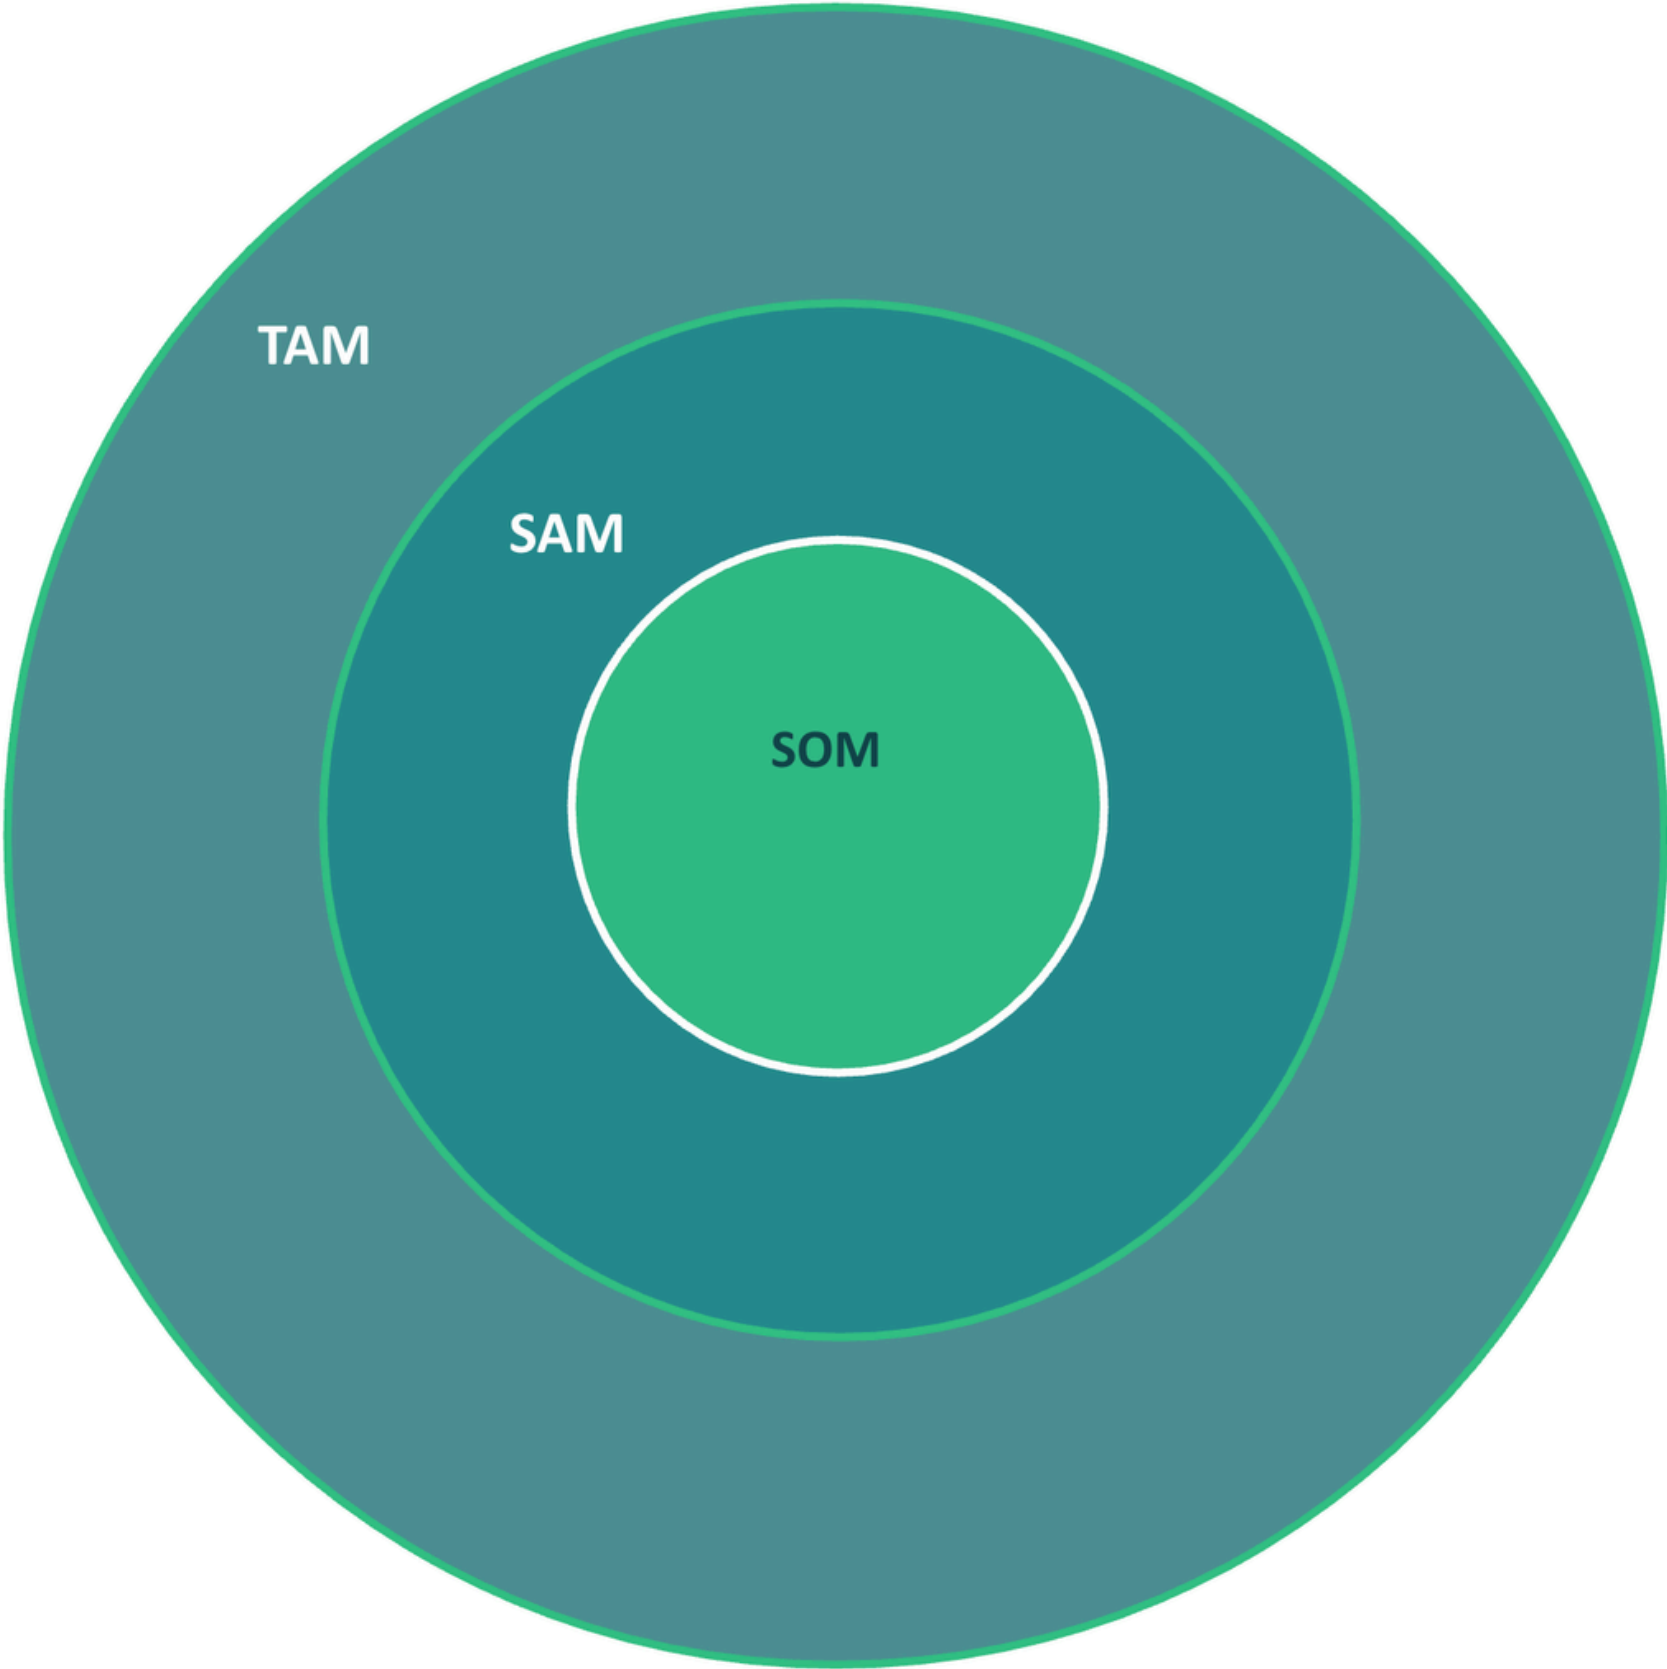

5 major banking groups (80% of market), ~20 neobanks/digital banks targetable. Estimated annual digital innovation budget: €380M. Source: ACPR 2024.

SOM

Serviceable Obtainable Market — €3.8M (Yr 3)

22 partner banks × 1.1M active end-users

Realizable revenue from 4 banks (Yr 1) → 22 banks (Yr 3), €340k–€3.8M. Conservative assumptions on adoption rate and ARPU.

VISION -> CAPTURABLE REVENUE

SOM Growth — Finova Revenue Trajectory

KEY ASSUMPTIONS

- 01 300+ licensed banking institutions in France (source: ACPR 2024)
- 02 Tier 2/3 + neobanks targeted in Yr 1, then major groups (BNP, SG...) in Yr 2-3
- 03 Avg. ARPU: €2.5/active user/month (SaaS license + per-user fee)
- 04 Estimated adoption rate: 12–18% of partner bank's client base
- 05 EU PFM/AI banking market growing at +20% CAGR (Business Research Insights 2025)

GO-TO-MARKET

STRATEGY

PHASE 1

Partnership & Integration (Year 1) :

- Target Partners: Focus on Tier 2 and Tier 3 digital-forward banks and Neo-banks in France to allow for faster decision-making.
- Strategic Pilot Programs: Launch 3-month "Proof of Concept" (PoC) pilots with 2 partner banks to validate the widget's impact on user engagement.
- Distribution: Integrate as a "plug-and-play" widget within existing banking app infrastructures to minimize technical friction.

PHASE 2

Scale & Hyper-Personalization (Year 2-3) :

- Expansion: Target major French retail banks by leveraging PoC data (e.g., increased session duration and lower churn).
- Value-Added Features: Introduce premium AI financial coaching tiers and referral programs for partner financial products (insurance, loans).

REVENUE MODEL

A HYBRID B2B SAAS MODEL

Stream	Pricing Model	Target
SaaS Licensing	Annual flat fee per bank for widget maintenance & security: €85k/each	Partner Banks
Per-User Fee	Tiered pricing based on the number of "Active Financial Goals" tracked: €1.20/each	Partner Banks
Success Fee	Commission on every bank product (loan/insurance) converted via AI advice: €15/referral	Partner Banks

FINANCIAL FORECAST

- **Revenue Growth:** Target 3-5 bank partners in Year 1, scaling to 20+ by Year 3.
- **Key Efficiency Metrics:**
 1. **LTV (Lifetime Value):** High, due to the sticky nature of B2B banking contracts.
 2. **CAC (Customer Acquisition Cost):** Focused on professional events and B2B networking for bank executives.
- **Break-even Point:** Aim for profitability by month 24, once the volume of end-users exceeds 500k across all partner platforms.

Metric	Year 1: Launch	Year 2: Expansion	Year 3: Scaling
Partner Banks	4 Banks	12 Banks	22 Banks
Total End-Users	80,000	300,000	1,100,000
Annual Revenue	€340k	€1.15M	€3.8M
Operating Expenses	(€850k)	(€1.2M)	(€1.8M)
EBITDA	(€510k)	(€50k)	€2M
